PROJECTS

Anna's World, Jul 2024 - github.com/JenniferT9462/Annas-World

- Created a kid-friendly website integrating e-commerce, interactive mini-games, and YouTube project showcases.
- Implemented designs with HTML, CSS, Bootstrap, and Microsoft AI Image Creator.

Knitting App - Zen Knits, Sep 2024 - github.com/JenniferT9462/The-Knitting-App

- Developed an app to manage knitting projects and get inspiration for future projects.
- Built with HTML, CSS, Bootstrap, Javascript
- The app uses Ravelry API and an AI model from HuggingFace.

Planner App - ZenFlow, Nov 2024 - github.com/JenniferT9462/Planner-App

- Developed a planner app enabling users to manage events, track habits, visualize progress, and journal mood entries.
- Built with React, Next.js, and Tailwind CSS for responsive design and user experience.
- Integrated backend with Next.js API Routes, Upstash for data storage, and Resend for email notifications.

- Visualized habit and mood data using Recharts and ensured feature reliability with Storybook and Postman testing.

E-commerce - Brew Haven, Jan 2025 - github.com/JenniferT9462/coffee-shop-frontend

- Developed an e-commerce site enabling users to browse products, add items to their cart, checkout cart, and signup/login to save their cart and order history.
- Built with React, Next.js and DaisyUI/Tailwind CSS for responsive design and user experience.
- Integrated backend with Express.js API Routes and MongoDB for data storage.
- Ensured feature reliability with Storybook and Postman testing.
